

Secondary Impact Crusher

Reach new height with KEFID

- Unique design of structure
- High qualified heavy rotor
- Built-in open-top device
- More stable cast steel structure

As China's largest crushing plant, mill equipments and beneficiation plants production base, kefid has exported large quantities and high-end mobile crushing plant and milling equipments to Russia, Kazakhstan, Indonesia, Ecuador, South Africa, Saudi Arabia , Oman more than 100 countries and regions and have solved about thousands of and beneficiation projects all over the world, which has made tremendous contributions to the local construction, mining industry and developments.

Secondary Impact Crusher is widely used in construction material, highway and railway, cement, mining and chemical fields etc. It is designed to crush soft and medium hard rock. The size range of feed material (maximum compression strength 300Mpa, the moisture should be below 8-10%) can be up to 700mm. Hydraulic impact crusher improves the adjusting device making operation more convenient. The three- cavity makes excellent capability in fine crushing and super fine crushing line.

S series impact crusher own outstanding performance

1. Applying advanced technology. Adoption of the world-class manufacturing processes and the most high-end raw materials.
2. Stable structure. By the design of heavy type rotor and integral cast steel structure, we can guarantee the operation more stable.
3. Improve the quality. Making the design of the equipment more reasonable and quality more secure by repeated and strict test.
4. Easy to operation. Built-in open-top device enables to a fast and easy replacement of wearing parts, which reduce the labor cost.

Mobile Secondary Crushing & Screening Plant • **Secondary impact crusher & Screening Plant**

MAIN FEATURE

Add the adjustable function of vibrating screen installation angle, and strengthen the whole machine's production capacity.

Flexible and motorized parking function, and start the work mode quickly.

Possess the crushing unit interchangeable system and screening unit interchangeable system, satisfy different kind of production need.

Anytime, anywhere, transformation and upgrade

Mobile Cone Crusher is another kind of mobile crushing unit, mainly to satisfy different requirement of final products. Cone crusher replaces impact crusher to produce much harder and fine stone or sand products.

Extended functions

Impact crusher and cone crusher interchange system: One automobile body is common used in multiple type of machine, crushing unit interchange system and screening unit interchange system, only need to invest on single machine, in a short time, crushing unit interchange system and screening unit interchange system used in the same automobile body can be come true in the mine site, all the system in the overall unit match perfectly.
