PF serious of impact crusher is a kind new style crushing equipment which adopt developed technology from domestic and overseas , unique structural design and optimized performance. Impact crusher is of Reasonable structure, easy operation, strong impulsion, high production efficiency, precise final product size, reliable quality, well-distributed final product size, which is widely used in crushing of stone, ore, limestone, rock, and refractories and play an important role in railway, road construction and other industries.

PF serious of impact crusher is of multiple functions High comprehensive benefits

1.High quality.Adopting high-end raw materials;Hammer is made of high chrome;liner board is made of wearable materials;reduce wear;improve the quality of equipment;lengthen service life.

2.High production.Both of the tooth impact plate and the large rotary inertia increases the crushing strength,what's more,the big crushing cavity can crush the bulky materials so as to improve the production efficiency.

3.New design concept.Key-free connection enables an easy maintenance and the low operation cost.

4.Easy control.Clearance between the impact bracket and the hammer is adjustable,thus the shape and size of the finished products is easily controlled.

5.Well-distributed final product size. Final products is cubic.

Mobile Secondary Crushing & Screening Plant • Secondary impact crusher & Screening Plant

MAIN FEATURE

Add the adjustable function of vibrating screen installation angle, and strengthen the whole machine's production capacity.

Flexible and motorized parking function, and start the work mode quickly.

Possess the crushing unit interchangeable system and screening unit interchangeable system, satisfy different kind of production need.

Anytime, anywhere, transformation and upgrade

Mobile Cone Crusher is another kind of mobile crushing unit, mainly to satisfy different requirement of final products. Cone crusher replaces impact crusher to produce much harder and fine stone or sand products.

Extended functions

Impact crusher and cone crusher interchange system: One automobile body is common used in multiple type of machine, crushing unit interchange system and screening unit interchange system, only need to invest on single machine, in a short time, crushing unit interchange system and screening unit interchange system used in the same automobile body can be come true in the mine site, all the system in the overall unit match perfectly.
